

Gravie level-funded health plans

Predictable costs. Flexible plan designs. National coverage.

Traditional funding models are failing SMBs

Traditional fully-funded health plans often miss the mark for small and midsize businesses. Small and midsize firms account for the majority of U.S. business, yet they remain severely disadvantaged when it comes to health benefits. Employees at SMBs pay a higher share of total premiums and larger deductibles compared with their counterparts at larger firms, according to data from Commonwealth Fund, while their employers face rising costs and limited flexibility.

Solution: Level funding

Self-funded health plans can give employers more control and cost transparency, but they also carry significant financial risk. A single high-cost claim can overwhelm a small employer's budget.

Gravie's level-funded plans solve this problem by combining the advantages of self-funding with the protection of integrated stop-loss insurance. Employers gain:

- Predictable monthly payments
- Financial protection from high-cost claims
- Refund potential when claims are lower than expected

Why Gravie?

- Gravie is the only health benefits company SMBs can turn to for both level-funded and ICHRA solutions.
- Our flagship product, Comfort[®], offers no-cost coverage on common, in-network clinic and office services, such as primary and preventive care, urgent care, specialty visits, generic drugs and virtual care.
- In addition to Comfort, we offer a range of other level-funded products that allow for varied cost strategies, including traditional HSA and copay plans.
- We provide uncompromising service, delivered by the Gravie Care team's live-human support and dedicated account management, ensuring support at every step, not just at enrollment.

A level-funded plan for everyone.

Gravie's level-funded solutions give employers the best of both worlds — the cost savings and control of self-funding, with the stability and support of a trusted partner.

Our plan options include:

- **Comfort:** Our flagship plan provides no-cost access to common, in-network services, such as primary and preventive care, urgent care, specialty visits, generic drugs, and virtual care.
- **ComfortFit:** ComfortFit focuses on no-cost access for common core services and drugs. Higher-cost services such as advanced imaging, ER visits, and specialty drugs are subject to more cost-sharing
- **Copay plans:** Copay plans require initial payment for certain services. More traditional cost sharing, with ACA-approved preventive care and drugs at no cost, backed by Gravie Care support
- **Qualified high deductible health plans:** QHDHPs pair lower premiums with a higher deductible, unlocking access to an HSA, giving employees a tax-advantaged way to save for medical expenses
- **High deductible health plans:** HDHPs offer the simplicity of a single out-of-pocket maximum, but full member responsibility until that out-of-pocket maximum is reached.

Every Gravie level-funded plan also includes:

- National provider networks, including Aetna or Cigna Healthcare® (including the Cigna LocalPlus narrow network), and select regional networks
- Stop-loss protection administered in house
- Pharmacy benefits administered through Express Scripts
- Virtual urgent care, mental health, and dermatology services through Teladoc and Virtual MSK therapy through Sword Thrive
- Transparent claims reporting and ongoing plan performance insights

Gravie delivers innovative, affordable, and sustainable health benefits that give brokers a competitive edge with small and midsize employers. Interested in learning more about how to partner with Gravie to help level up your clients' benefits strategies?
