

MORE BENEFITS. FEWER ASTERISKS.

What members love about Gravie

We keep the beat on what
our members are saying.

In an industry with comparatively low customer satisfaction, we designed our health plans around a simple goal: **create benefits that our members can love, with service and support that never skip a beat.**

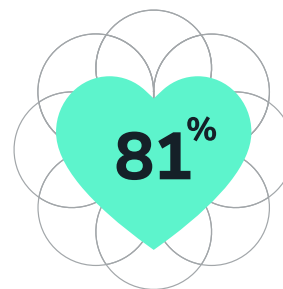

Every month we survey thousands of Gravie members on the **satisfaction** with their health benefits and the **effort** required to use them, and we publish those findings here. These scores serve as a beacon for our team members across the organization and a reminder that we can always be aiming higher on behalf of our members.

Customer Satisfaction:

Measures what percent of our membership is satisfied or very satisfied with their Gravie health plan.

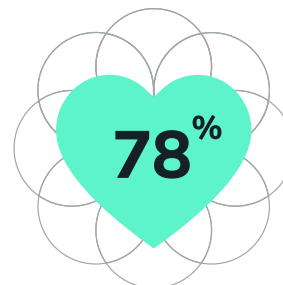

Customer Effort:

Measures what percent of our membership finds it easy for very easy to work with Gravie.

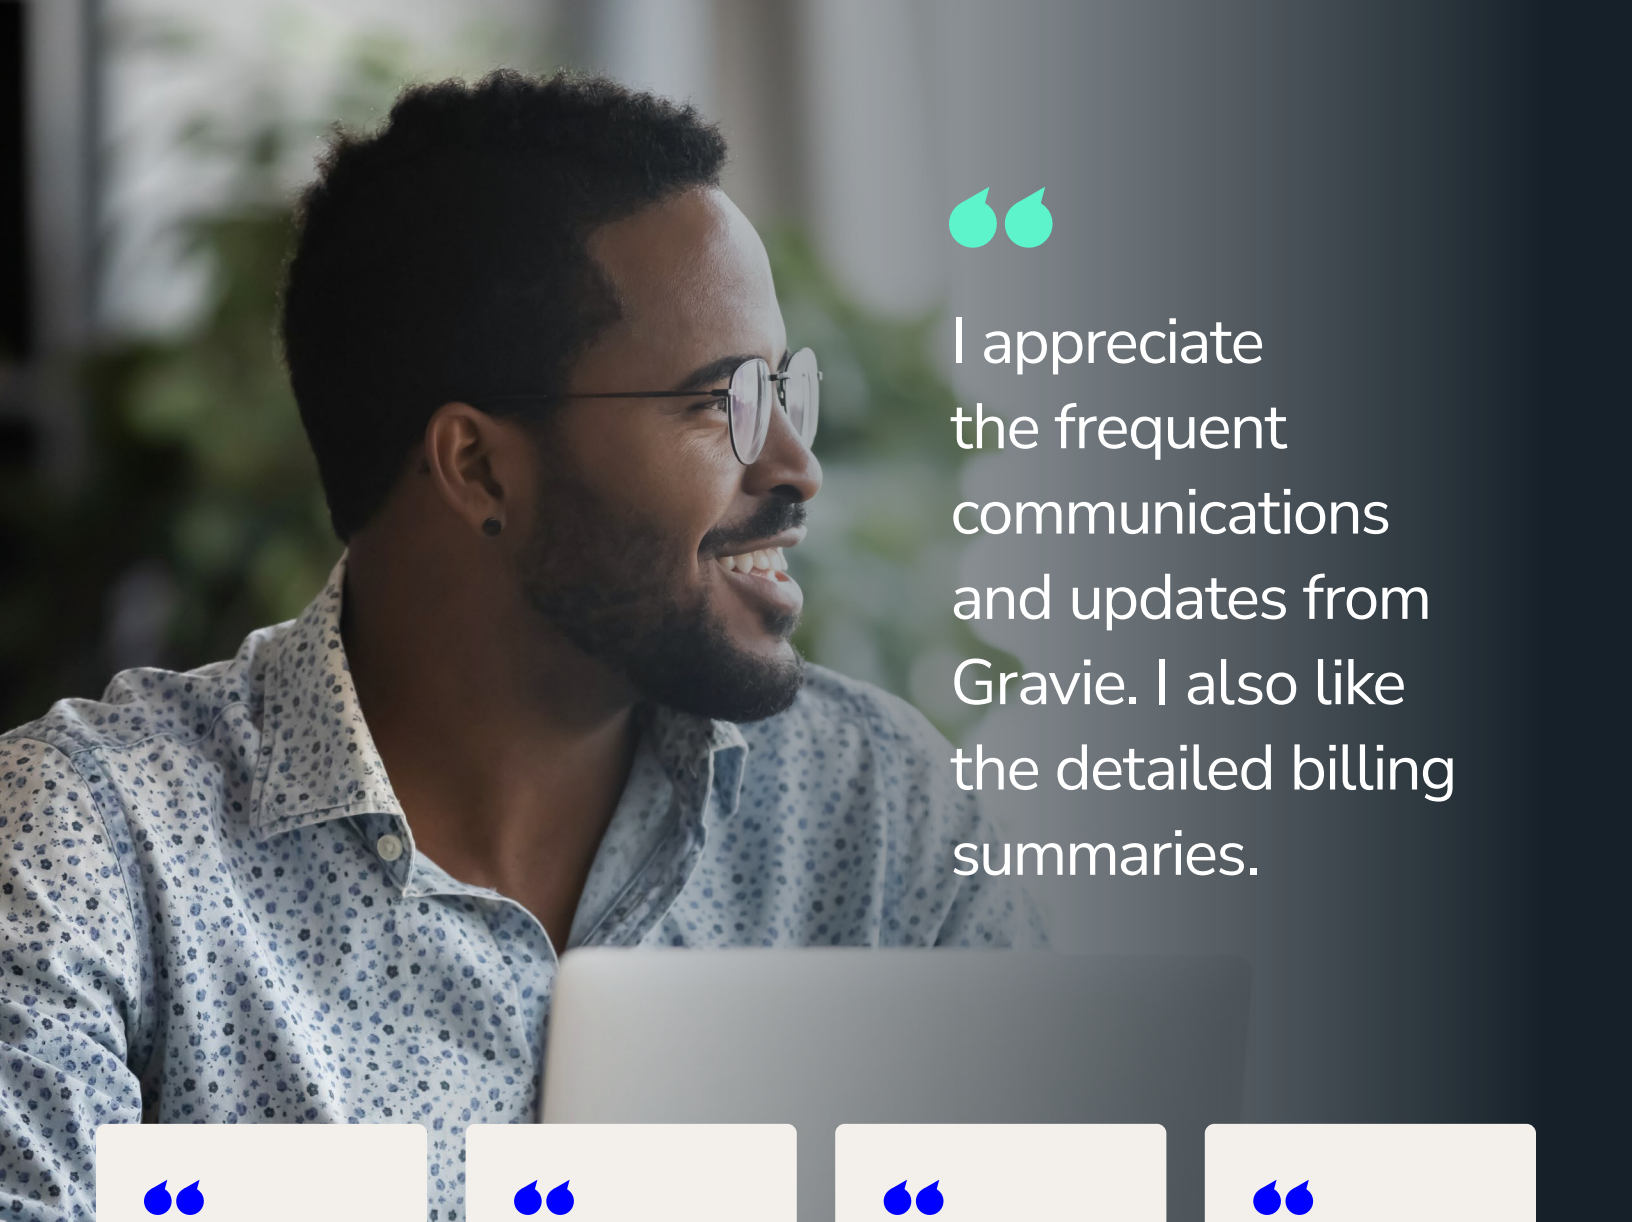

Customer Satisfaction Score (CSAT)

Industry average = 56%
(Forrester, 2024)

Customer Effort

Industry average = 63%
(Forrester, 2024)

I appreciate the frequent communications and updates from Gravie. I also like the detailed billing summaries.

Amazing staff, and the coverage is everything it states in your benefits package!

The representative was attentive and helpful. I felt like she went out of her way to help me.

Really appreciate the additives like at-home physical therapy and fitness! Nice touch!

This is the best health plan we have ever had. Having Teladoc has also been amazing.
